**DETAILED ACTION** 

1. Claim 1 is pending for examination.

2. Claim 1 is rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fruehling et al, U.S.

Patent 6,625,688 B1.

4. As per claim 1; "A method for controlling a microcontroller in a control unit in a motor

vehicle having a processor core containing at least one read-only memory area, and at least one

rewritable memory area, at least one control program that is intended to be processed by the

processor core being stored in the rewritable memory area, the method comprising:

storing a verification program in

a write-once memory area of the rewritable memory area;

storing a service program in

the read-only memory area;

calling the service program by

the control program

Application/Control Number: 10/534,372

Art Unit: 2136

at regular intervals;

calling the verification program by

the service program;

resetting a counter by

the service program when called by

the control program;

verifying at least part of the rewritable memory area by

the verification program;

triggering a reset one of

by the verification program in the event of

manipulation of the verified memory area and

by the counter in the event of

counter overflow [ABSTRACT, figures 1-8c and associated descriptions, whereas the determination of the health of a microcontroller used for automotive applications/environments via the use of reference signatures created (and stored as intermediate data structures), processed, and cross-referenced via the single/dual processing elements such that the signature are representative of associated memory (i.e., ROM, volatile/non-volatile, etc.,) configurations, clearly encompasses the claimed limitations as broadly interpreted by the examiner.].".

Application/Control Number: 10/534,372

Art Unit: 2136

## Conclusion '

5. Any inquiry concerning this communication or earlier communications from examiner should be directed to Ronald Baum, whose telephone number is (571) 272-3861, and whose unofficial Fax number is (571) 273-3861 and unofficial email is Ronald.baum@uspto.gov. The examiner can normally be reached Monday through Thursday from 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Sheikh, can be reached at (571) 272-3795. The Fax number for the organization where this application is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. For more information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
